## 6. CONCEPTUAL DETAILS IN THE LIFE OF ANY INTERIOR!

-Object: Door handle "Aphrodite"

-Designer: Anton CiHC

-Material: Plastic

-About the project: For a long time looked at the square door handle until it formulated a general form in the mind. As a result, I added a small compartment for the key of the door which opens this pen. It turns out a kind of game with objects that have a common function.

-Object: Faucet "La Flora"

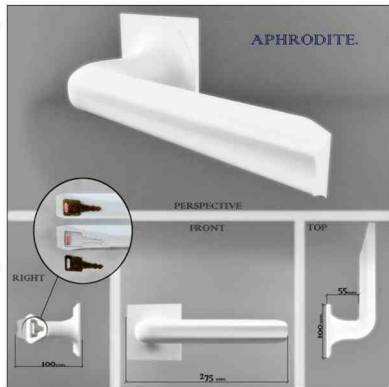

-Designer: Anton CiHC

-Material: Nickel, veneer, plastic, vegetation

-About the project: For a long time looked at the square door handle until it formulated a general form in the mind. As a result, I added a small compartment for the key of the door which opens this pen. It turns out a kind of game with objects that have a common function. From the outset, offer was to divide mixer, destroying it with the help of the form of something beautiful to focus on this. Add in a mixer kind of living sculpture, by separation of the drain tube in the middle of the spout of the mixer, and connect it to the tip. I had a long time to reflect on this concept, and then when everything seemed ready. It was decided to review the concept, create an ellipse. Make thinner and install a container garden. At this stage it is completely determined by the current direction.

Portfolio product design:

-Object: Coffee table "Nint Objects"

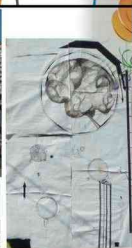

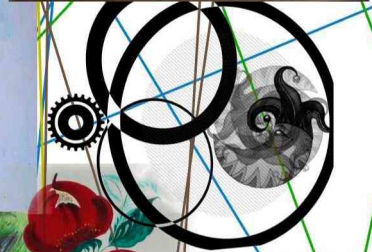

-Designer: Anton CiHC

-Material: MDF colored gloss, metal mechanisms, rubber casing.

-About the project: Sometimes the existence of geometric shapes of different nature brings fancy fruit. Subject matter of any form is that it contains a area. This space may be filled with a meaning of need for the fruitful work of the human body. True generator fantasies!
