Who I am:

My approach is always solution-oriented.

I enjoy working in an international and intercultural context. I always strive to provide ideal services and full satisfaction to my clients. I incorporate technical and service-oriented components as well as organisational structures and economic figures into my planning and thinking within each assignment I am entrusted with.

My management decisions are based on analysing the economic situation, the process technologies and the energy-efficient interrelationships of a project in order to find and implement more effective solutions.

Hausen im Wiesental, the 8th of February 2024

A handwritten signature in blue ink, appearing to read 'Thomas Kling', with a stylized flourish at the end.
